

## ZAKLJUČNO POROČILO

*o rezultatih internega raziskovalnega projekta UKC Maribor  
za obdobje od 24. 11. 2017 do 23. 5. 2023*

### A. PODATKI O RAZISKOVALNEM PROJEKTU

#### Osnovni podatki o raziskovalnem projektu

Šifra projekta:	IRP-2017/01-04	
Naslov projekta:	OCENA OPTIMALNEGA VOLUMSKEGA STANJA PRI BOLNIKI NA NADOMESTNEM ZDRAVLJENJU Z DIALIZO S POMOČJO ULTRAZVOKA PLJUČ IN BIOIMPENDANCE TER VPLIV VOLUMSKEGA STANJA NA 24-48H KRVNI TLAK, ARTERIJSKO TOGOST IN PREŽIVETJE	
Vodja projekta:	prof. dr. Robert EKART, dr. med.	
Trajanje projekta (leta, od-do):	5 let 6 mesecev	24. 11. 2017 - 23. 5. 2023
Velikost projekta	<input type="checkbox"/> mali (do 10.000,00 EUR)	<input checked="" type="checkbox"/> veliki (do 50.000,00 EUR)

### B. REZULTATI IN DOSEŽKI RAZISKOVALNEGA PROJEKTA

#### 1. Poročilo o realizaciji predloženega programa raziskovalnega projekta - opis raziskave (izhodišča, predstavitev problema, metode dela), ugotovljeni rezultati in uporaba (*največ do 3 strani*)

Volumska preobremenitev je vodilni dejavnik tveganja za smrt in srčnožilne dogodke pri bolnikih s končno ledvično odpovedjo na nadomestnem zdravljenju. Zgodnje prepoznavanje volumske preobremenitve lahko pri teh bolnikih prepreči srčnožilne posledice. Klinični znaki volumske preobremenitve so pogosto nezadovoljivi, da bi z zanesljivostjo lahko odkrili bolnike s tveganjem. Po drugi strani nam standardne tehnike za meritve izvenceličnega in krvnega volumna ne podajo dovolj informacij o osnovnih parametrih srčne funkcije, ki določajo hemodinamsko toleranco na presežek volumna in odvzem tekočin (polnitveni tlak in funkcijo levega prekata) pri posameznem bolniku. Od teh dejavnikov je odvisna izvenžilna pljučna voda, ki predstavlja približek cirkulirajočega volumna in polnitvenega tlaka levega prekata. Zato je ocena pljučne vode boljši kriterij za odkrivanje bolnikov z visokim tveganjem za škodljive klinične dogodke in za spremljanje učinka zdravljenja, ki bi preprečili takšne dogodke.

**METODE DELA:** Namen naše klinične raziskave je pri bolnikih s končno ledvično odpovedjo na nadomestnem zdravljenju s hemodializo ali peritonealno dializo opraviti meritve, s katerimi bomo z več metodami ocenili volumsko stanje bolnika. Vsem bolnikom smo s pomočjo ultrazvoka izmerili izvenžilno pljučno vodo, stanje tekočinske preobremenitve s pomočjo bioimpedance, izmerili smo tudi hitrost karotidno-femoralnega pulznega vala, debelino intime medije karotid in pri nekaterih izvedli 48-h neinvazivno merjenje krvnega tlaka. Na podlagi teh meritev smo bolnikom na nadomestnem zdravljenju s hemodializo prilagodili intenzivnost dializnega zdravljenja – bodisi s spremembo dializnega režima odvzema tekočin,

spremembo dolžine hemodialize, prilagoditvijo antihipertenzivnih zdravil. Pri bolnikih na peritonealni dializi smo na podlagi rezultatov meritev preiskav po potrebi spremenili režim menjav peritonealnih raztopin, dolžino dializnega zdravljenja pri bolnikih na avtomatizirani peritonealni dializi in prilagodili antihipertenzivna zdravila.

REZULTATI: Sodelovali smo v mednarodnem projektu LUST in SubLust, v katera je vključenih veliko naših bolnikov.

S študenti Medicinske fakultete UM smo sodelovali v dveh študentskih raziskovalnih nalogah, objavili članke, prispevke na kongresih in za obe nalogi prejeli Srebrno in Bronasto Dekanovo nagrado.

2. Ocena stopnje realizacije in zastavljenih raziskovalnih ciljev (*obkrožite*)

DA

NE

Če je odgovor NE, napišite kratko utemeljitev

**3. Pridobitev za UKC Maribor - doktorska disertacija, članek, prispevek na znanstveni konferenci/simpoziju ali kongresu, patent, uvedba novih dejavnosti, smernic in metod ali izboljšanje že obstoječih itd. (največ do 1 stran)**

Doktorska disertacija, magistrska naloga, raziskovalna naloga, specialistična naloga:

Na podlagi rezultatov tega projekta so študentje prejeli dve Dekanovi nagradi MFUM: LUČIČ ŠRAJER, Lucijan, MARKO, Katharina. *Bioimpedanca, arterijska togost in krvni tlak pri bolnikih na peritonealni dializi*. Maribor: [L. Lučič Šrajter, K. Marko], 2021. 45 f., ilustr. <https://dk.um.si/IzpisGradiva.php?id=81240>. [COBISS.SI-ID 93108995]

nagrada: Bronasta Dekanova nagrada

KEBER, Gašper. *Bioimpedanca, arterijska togost in krvni tlak pri hemodializnih bolnikih*.

Maribor: [G. Keber], 2021. 40 f., ilustr. <https://dk.um.si/IzpisGradiva.php?id=81274>.

[COBISS.SI-ID 96646403]

nagrada: Srebrna Dekanova nagrada
